Amount Paid:	R 0.00	
Reference:	No Charge	
File Code:	1/2/1/6/5/B	

DESCRIPTION

PROPERTY

Organization	The Shark Research Unit
Full Name:	Mr. Nicolaas Gerrit Booyens
Identity Number:	9908315294087
Postal Address	Robberg Nature Reserve & MPA
City / Town:	Plettenberg Bay
Province / State:	Western Cape
Country:	South Africa
Postal / Zip Code:	0000
Longitude:	23°24.134'E
Latitude:	34°6.275'S

SPECIES (SCIENTIFIC NAME)

QTY

NOTE

Great White Shark	(Carcharodon carcharias)	0	Unlimited: For observation purposes only.
Note.	(Note.)	0	Conditions apply Note special conditions.

Issued By:

Willem De Klerk

Approved on Behalf CEO

Western CapeNature Conservation Board

Effective Date:

Signature of Holder:

I acknowledge, accept and understand fully the permit conditions as described.

STANDARD CONDITIONS

1. The holder of this permit shall return it together with a full report of all activities, findings and observations made while on the nature reserve to the Chief Executive Officer, Western Cape Nature Conservation Board, Private Bag X29, Gatesville, 7766, within fourteen days from the date of expiry thereof.
2. THIS PERMIT IS SUBJECT TO SPECIAL CONDITIONS.

SPECIAL CONDITIONS

PROJECT TITLE:

Determining the demographic variation of great white sharks (*Carcharodon carcharias*) in Plettenberg Bay, using observation techniques.

PERSONS INVOLVED:

Ryan Johnson, PI | Passport: LM480353 | email: sharkyryan@gmail.com

Nicolaas Booyens, Researcher | ID: 9908315294087 | email: nico@shark-research.com

METHODS:

- Clifftop observation points
- Remote Underwater Video (RUV) points

This permit is subject to the following special conditions:

1. The permit holder must contact the conservation manager at least 2 weeks in advance before he intends to visit Robberg World Heritage Site and Marine Protected Area to discuss logistic arrangements for the research work.
2. The vantage observation points (A & B indicated in the research proposal) must be identified in collaboration with the Conservation Manager to prevent trampling of sensitive vegetation and soils. In the past it was found that areas become trampled by tourists who are curious to see what the research team is observing. Every effort must be made by the permit holder and researchers to prevent tourists from having access to the vantage points "A" and "B".
3. It is understood that the remote underwater video points will not be baited to attract the sharks. No bait may be used to attract the sharks to the video points.
4. A permit must be obtained from DFFE: Oceans and Coasts before the project may commence.
5. Data of all records observed must be captured on the SOB datasheet and submitted to CapeNature in an electronic format for inclusion in the SOB database.
6. Copies of all reports or publications resulting from this research must be submitted to CapeNature for internal dissemination to relevant staff.
7. The conservation manager may request that a field ranger accompanies the permit holder when field work is undertaken as a learning experience.
8. All the members involved in the field work must be listed on the permit.
9. The permit holder may be requested to do a presentation to CapeNature staff as a learning and knowledge sharing opportunity.
10. Standard conditions must apply.
